

X-Press Lift Tools

A division of X-Press Truck Tools

resolves a laborious task in the grain industry!

XLT SYSTEM

- High torque drill kit.
- Drill kit consists of: specially manufactured lithium-ion battery powered drill, 18V battery, battery charger, tool bag, coupler and TED straps (not shown below).
- A coupler and an insert manufactured for grain trailer hopper doors.
- Drill can also be used to connect/disconnect grain trailers. Same coupler or insert will be used for both the hopper doors and landing gear in most cases.

BENEFITS + HOW

Benefits:

- Decrease time to unload grain hoppers.
- Totally eliminate shoulder, back and arm strains due to this task.

How:

- Specialized coupler attached to XLT drill and an insert for trailers not using the Timpte connector “standard”.
- **High torque drill** assembled in a steering wheel design. Safety is a concern and directly resolved by the XLT System using the GRAIN TED (torque elimination device) shown on 1st page.
- Each truck has XLT kit which consists of drill, battery, charger, coupler, tool bag and grain coupler and insert (if needed).

DRILL and Coupler/Insert

Above is the XLT drill. The coupler for the Timpte trailers is lower right with the insert to the coupler for use on the non-Timpte trailers shown above it.

Above is the GRAIN TED which eliminates any drill twist possibility. Above right, the driver working directly on a Timpte trailer without any TED.
